**TABLE PYLON**  
**Confident demeanour**

Hot news: The PYLON table has just been awarded the coveted German Design Award 2025, highlighting its exceptional and innovative design! This award confirms our vision and commitment to combining outstanding design with high-quality materials such as wood. The German Design Award is one of the most prestigious design awards in the world and emphasizes the unique aesthetics and quality of the PYLON table.

We are particularly excited to present this fresh award at the ORGATEC trade fair. We are showcasing the outstanding design and versatility of the PYLON table to an international audience, highlighting its suitability for both commercial and office settings. Experience the PYLON table as a design statement that enriches both work environments and modern spaces.

The striking legs of the PYLON table are a standout feature that gives the piece its unique identity and serves as a prominent design element. Their wide tapering towards the bottom provides the table with a solid base while simultaneously emphasizing the modern elegance of the overall concept.

The PYLON table model embodies a modern and contemporary aesthetic characterized by clean lines and innovative design elements. A defining feature of the PYLON table is its apronless structure, which creates a seamless and airy impression. The versatile PYLON table model offers the flexibility to be designed in various shapes to meet different needs and spatial concepts. The table can be configured in round, square, or rectangular shapes, adding an extra layer of variability to the design.

Available in all solid wood types from vitamin design collection: European oak and knotted oak, ash, beech, core beech, American maple, walnut and cherry wood, treated with herbal oil.

## TABLE PYLON round

A round PYLON table creates a friendly and welcoming atmosphere. The legs, which widen towards the bottom, emphasize the table's central structure and give it a balanced symmetry.

## TABLE PYLON square

The square version of the PYLON table brings clear and modern geometry into the room. The slim legs, which widen towards the bottom, create visual accents and give the table a distinctive dynamic appearance.

## TABLE MOLLIS

The dining table stands out for its minimalist design and the harmonious blend of form and function. Without visible aprons, the model maintains a clear, streamlined structure that is subtly softened by gentle curves. The solid wood from which the table is made gives it a natural presence and warmth that pleasantly fills the room. With its puristic approach and finely tuned details, the table emphasizes a restrained yet impactful aesthetic that seamlessly integrates into various interior concepts. A notable feature is the generous legroom, allowing chairs with armrests to be easily tucked under the table.

Available in all solid wood types from vitamin design collection: European oak and knotted oak, ash, beech, core beech, American maple, walnut and cherry wood, treated with herbal oil.

### TABLE CITIUS frameless

An extension of the existing Citius model, this piece presents itself as an elegant and contemporary piece of furniture. Compared to the original model, this table is designed without an apron, giving it an especially light and airy appearance. The clean lines and the absence of visible frame elements highlight the beauty of the solid wood, lending the table a modern aesthetic.

The apronless design is particularly practical, providing ample space under the table for chairs with armrests. This feature allows for comfortable seating without any obstructive frame elements in the way. This not only enhances the table's overall aesthetic but also improves its functionality in everyday use.

The smart addition of the apronless version to the Citius model series underscores the versatility of this table range. Whether as a dining table in the living area or a conference table in the office, this solid wood table seamlessly integrates into various settings, emphasizing timeless design and practical usability.

Available in all solid wood types from vitamin design collection: European oak and knotted oak, ash, beech, core beech, American maple, walnut and cherry wood, treated with herbal oil.

**BED MOLLIS**

The bed impresses with its simple elegance, rooted in the natural beauty of solid wood. The striking, clean lines and carefully crafted curves of the frame create powerful design accents, giving the piece a distinctive presence. The lively wood grain and the gentle yet defined shaping create a cozy atmosphere, turning the room into an oasis of calm and simplicity. The slightly inclined headboard is not only a functional detail but also a stylish design element, perfect for reading or enjoying a morning coffee in bed. This bed combines timeless aesthetics with thoughtful functionality, making a strong, elegant statement in any bedroom.

The matching bedside table for the modern solid wood bed is designed with a minimalist and elegant style. The bedside table has a compact, rectangular shape and stands on slightly rounded, sturdy legs that echo the light and airy aesthetics of the bed.

Available in all solid wood types from vitamin design collection: European oak and knotted oak, ash, beech, core beech, American maple, walnut and cherry wood, treated with herbal oil.

## BED FACHWERK

A solid wood bed in modern timber-frame construction combines tradition with contemporary design, becoming a highlight in any bedroom. The characteristic features of timber-frame architecture, such as exposed beams and sturdy wood joints, are reinterpreted with a modern, minimalist design language. The result is a unique piece of furniture that harmoniously blends natural materials with clean lines. This bed is more than just a piece of furniture—it's a statement where design meets craftsmanship. The load-bearing frame, made from solid wood, is assembled using visible joints like mortise and tenon, which not only impress visually but also provide exceptional stability. These artisanal techniques, derived from traditional timber-frame construction, give the bed a rustic elegance while making it extremely durable. Crafted from high-quality solid wood, this bed perfectly showcases the natural beauty of the material. The surface is finely sanded and oiled to highlight the warm grain and unique texture of each individual wood element. The wood also contributes to a natural indoor climate.

Available in all solid wood types from vitamin design collection: European oak and knotted oak, ash, beech, core beech, American maple, walnut and cherry wood, treated with herbal oil.

## SIDEBOARD PYRA

The PYRA sideboard stands out for its high-quality craftsmanship and simple, elegant design. It is designed without handles, giving the piece a modern and minimalist appearance. Instead of traditional handles, distinctive grooves are integrated into the fronts to allow the doors to open. This understated design choice highlights the beauty of the solid wood. The clean lines and absence of ornamentation or unnecessary embellishments make this chest of drawers a versatile piece of furniture that can be seamlessly integrated into a variety of interior styles.
